Everything above printed by hand

We can offer selenium toning at extra cost. This is process mandatory for museums and galleries as it neutralises the post fixing silver process. It leaves very slightly toned prints that are UV resistant and can easily last (Kodak and Ilford state!) for up to 200 years

Presently prints are made by hand onto Ilford RC paper, dependant on interest we will be endeavouring to make fibre based prints available. We may also consider toned prints, ie warm toned or sepia toned...we will be populating the rest of the above as soon as we have carried out the appropriate costing of stock and consumables etc
